## *Hands on Science* Two UCS students take part in prestigious summer study program

Two Utica Community Schools seniors were among 35 Michigan students selected for a summer program designed to prepare a new generation of scientists and engineers.

Rachel Forsyth and Evan Phillips, Eisenhower High School and the Utica Center for Math, Science and Technology, were chosen to participate in the "Beacon High School" program at the Kellogg Biological Center in Battle Creek July 1 to 5.

The program, funded by the National Science Foundation, allows students to take part in interdisciplinary research program and develop innovative applications with actively evolving biological and technological systems.

Students were responsible for developing a research project and communicating their findings by making a
